Product Specifications

Use the stroke sander or edge sander for everything from general paint film finishing to fabric polishing.

DCCB: A standard product for polishing paint films, and can be used for all types of paint films. [For both dry and wet use]

LWCB-MS: Suitable for soft coatings and achieves a long life. Also suitable for textured finishes.

RCCB: A specification for hard polyester characterized by its high grinding power.

RCCB-MS: An anti-clogging version of RCCB. Ideal for materials that tend to clog, such as woodwork coating finish polishing.

RCCB-H: Achieves longer life with even higher grinding power than RCCB.

RCCB-HS: An anti-clogging version of RCCB-H. Ideal for materials that are prone to clogging, such as woodworking coating finish polishing.

TCCB (-MS, -H, -HS): Abrasive paper that is less likely to change shape or curl due to changes in humidity, etc.

Antistatic treatment prevents the abrasive powder from becoming statically charged.
